

Curriculum vitae

Sturla Sæther

Position

Key Account Manager

Education/Academic Degree

Ph. D. Faculty of Mechanical Engineering, NTNU (Norwegian University of Science and Technology)

Key Competence

- Thermal Heat and Power systems
- Combined Heat and Power (CHP) systems
- Energy analyses
- Boiler systems

Résumé

Sturla Sæther has been working with energy systems for more than 20 years. He has 4 years experience of energy saving in trade buildings where economical aspects of energy saving has been focused. In 1991 Sturla Sæther was employed by SINTEF. Here fundamental studies of combined power plants with CO₂ storage was performed. General thermodynamical system analyses with different tools are an important experience. Sturla Sæther joined Energos waste to energy company in 1998. Here he obtained practical end theoretical experience from heat and power generation with special focus on steam systems. Boiler fouling and design of cleaning system for heat transfers areas has been an important task. Sturla Sæther joined project performance from design to commissioning. The last two years Sturla Sæther has been engaged in Ecoxy. The main experience is related to gas turbines and general energy analyses projects.
